

Intermediate Level Supply Support

GSOC 0102

INTERMEDIATE LEVELS OF SUPPLY

OVERVIEW

- Two levels of supply inventory
- Purpose of SASSY/Supply Management Unit and Materiel Operations Center
- Low Density /Consumer-Level Reparable Issue Point (CLRIP)

LEVELS OF SUPPLY INVENTORY RETAIL INTERMEDIATE

Retail-Level of Inventory

- Intermediate Level of Supply – Inventory that is required between the consumer and the wholesale levels, i.e. MEFs.
- Examples:
 - Initial Issue Provisioning (IIP) stock
 - Pre-positioned War Reserve (PWR)
 - Direct Support Stock Control (DSSC)
 - Combat Service Support Units:
 - FSSG/MSSG
 - Reparable Issue Points

CONSUMER LEVEL OF INVENTORY

- Consumer Level of Supply – Limited range and depth, for the sole purpose of internal consumption.
- Using Unit Level of Supply.

WHOLESALE-LEVEL OF INVENTORY

Wholesale Level of Inventory.

- Inventory managers have asset knowledge and control to meet worldwide responsibilities.

Examples:

- Defense Logistics Agency (DLA)
- General Services Administration
- Marine Corps Logistics Base Albany/Barstow

SUPPLY MANAGEMENT UNIT

Purpose.

- Centralize record keeping, manage stocks, forecast, and collect critical data.
- Information point or link between using units and wholesale level.
- Mechanized, movable, and capable of deploying.

***SASSY Management Unit (SMU)
2d Supply Battalion
2d FSSG***

SMU ORGANIZATION

Organization.

- An integral element of the FSSG.
- Supporter of the DoD Joint Total Asset Visibility (JTAV) program
- Relies on timely and accurate flow of information from supported accounts and wholesale activities.

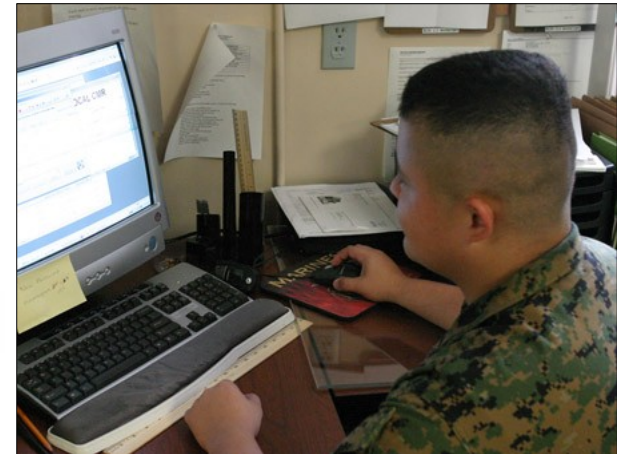

SMU FUNCTIONAL AREAS

Functional Areas.

- Administration – personnel, unit training, and publication management.
- Operations – policies and procedures; liaison concerning system support and problems.
- Customer Service – supports using units and provides technical research and management of records.
- Special Accounts – assigned by the SMU OIC.

SMU FUNCTIONAL AREAS (Cont.)

- Deployed Support Unit – provides direct link between the deployed unit and the SMU. Assists in preparation for operational deployment.
- Fiscal – manages all financial, statistical, and obligation transactions for both Requisition Authority (RA) and Planning Estimate (PE) funds.

SMU FUNCTIONAL AREAS

(Cont.)

- General Account - primary source of supply for all supported using units; establishes stockage criteria; maintains property records; replenishes stocks; manages customer demands and backorders.
 - **Functional areas:**
 - a. Storage - material accounted and owned by the General Account.
 - b. Stock Control- operating stock maintained on the General Account Balance File.
 - c. Inventory- conduct cyclic inventory program.

CTEP AND TAP

Contingency Training Equipment Pool

Training Allowance Pool.

- Maintains total allowance of individual type training and/or deployment equipment.
- Issued temporarily for cold weather and desert (hot) weather training.

REPARABLE ISSUE POINT

Reparable Issue Point.

- Sole source for direct exchange of secondary depot reparable items.
- Intermediary for supported activities and repair facilities, depot or above.

Low Density (LD)/Consumer Level Reparable Issue Points (CLRIP)

- Provides on site support to using units.
- Operates independently from the SMU, Main RIP, and FSSG.

Low Density (LD)

- Critical items purchased in very small quantities
- Controlled items that require special management.
- Combat/mission essential principle end items.

Example:

- 7th Communications Bn - Radars

Consumer Level Reparable Issue Point (CLRIP)

- CLRIP – Authorized to conduct 1st through 4th echelons of maintenance on low density, complex, and mission essential Principal End Items (PEI).
- The supply support concept is to have assets that support this equipment located at the Using Unit level.

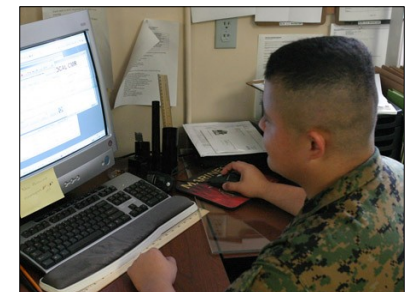

SUMMARY

- Two Levels of Supply Inventory
- SASSY/Supply Management U
Materiel Operations Center
- Low Density (LD)/Consumer
Level Reparable Issue Point (C

- Two Levels of Supply Inventories.
- SASSY/Supply Management Unit / Materiel Operations Center
- Low Density (LD)/Consumer Level Reparable Issue Point (CLRIP)
